

# ANET360

ANOTHER SET OF EYES

INTERACTIVE  
SAFE URBAN  
DRIVING COURSE

Let's face it, the modern world is no longer just about efficiency, it's also about evolution and impeccable attention to detail. The transportation industry is one that is relentlessly competitive. This requires that the level of training for drivers is extremely professional.

Training drives on the field is an expensive and often complicated process. This is the reason why we have created the ultimate immersive VR driver training experience for your audience.

**ANET360 GOING TO  
REDUCE TRAINING COSTS  
AND IT WILL PROVIDE  
A TRULY REMARKABLE  
TRAINING EXPERIENCE.**

ANET360 is going to give you the chance to achieve optimal results with your business.

Unlike field training, when drivers train with our ANET360 VR system, they will be put to the test with a large number of possible scenarios.

These situations would be difficult to test in a real training environment, but our system provides an intense and accurate representation of those possibilities.

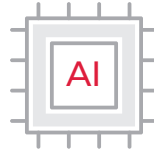

**ANET360 ABOUT SAVING  
MONEY, SAVING TIME,  
INCREASING  
PRODUCTIVITY AND  
UPGRADING DRIVING  
EFFICIENCY!**

## OUR SERVICES INCLUDE

**Spherical videos (4K) for a truly immersive VR experience**

**Machine Learning and AI to apply cognitive technologies**

**Professional analytics to monitor driver training results**

**Interactive driving features for a realistic approach**

## OUR ADVANTAGES

### **Collision prevention**

by identifying, prioritizing and addressing the root causes of poor driving practices before they lead to collisions.

### **Cost Reduction**

by significantly decreasing collision frequency and severity resulting in reduced liability costs.

### **Brand protection**

with a programmatic approach that gives companies world-class safety levels to reduce costs and protect the brand.

**THE FUTURE OF DRIVING TRAINING IS HERE AND IT WILL GIVE YOUR BUSINESS A STRONG COMPETITIVE EDGE!**
